Subject: RE: PFAS in HDPE containers - CONFIDENTIAL Do Not Share

Sorry, I have a meeting at 2:30-3:30PM. How about 2:00PM since David leaves at 3:30

Subject: FW: PFAS in HDPE containers - CONFIDENTIAL Do Not Share

It's happening, sooner than I thought -FOIA request for our data. Good thing they are only asking for the container/rinsate data.

Please move the final QA review to your top of to-do-list.

I will set up a meeting later this afternoon to talk about this. Is 3PM ok with everyone (except Yaorong)?

Thanks

Thuy

Subject: PFAS in HDPE containers

Hi, Ed. I want to thank you for joining the Mosquito Control for the Twenty-first Century Task Force meeting last week, and for sharing EPA's ongoing work on the fluorinated HDPE containers. I wanted to take advantage of your generous offer to speak offline about the work you're doing.

PEER did a FOIA for your test results on the containers on 1/15, and a response is due 2/19. Is there any way we could get those data from you, or do we have to wait for the FOIA process (which, as you know, can be incredibly long)?

I also have a few questions. I asked whether any of Clarke's other 59 pesticide products used these fluorinated containers, and you responded that some, but not all, did. Why is the company not red tagging those pesticides as well? Shouldn't the public be informed?

Also, you told me that EPA had removed the legacy PFAS approved inerts from InertFinder. And I see that the list is different, but it still includes a lot of different PFAS that were not there before. Can you explain to me what is going on (I'm hoping I'm misunderstanding what I'm seeing)? Why would any PFAS be on this list?

As you know, PEER is deeply concerned about the presence of PFAS in pesticides, and in these containers. We appreciate the work you are doing on this, but would love to understand it a little better.

Thanks so much,

Kyla
